

DESIGN HOMES THAT INSPIRE & DELIGHT

Stärke manufactures precision-made **Steel Frames** that enables Architects to design a better, more durable & healthier home for their clients. Steel enables the highest quality finish, every time. Resistant to moisture penetration, mould growth and warping, and backed up with a 50 year durability warranty for ultimate peace of mind.

We also happen to design our **Steel Frames** to work seamlessly with **Stärke Windows & Doors**, reducing on-site costs and delivering faster build times. Tested up to and beyond New Zealand and Australian standards with superior strength and water performance, so your clients can enjoy the highest specifications without the high price tag. STÄRKE FRAME

STEEL FRAMING FOR ARCHITECTS

WHY CHOOSE STÄRKE FRAME?

When it comes to designing a home, structural integrity is everything. Traditional wooden materials are prone to warp, sag or shrink over time, hence increasing the risks of cracked walls, jammed doors and waving roof lines. More Architects are specifying Steel Framing - here are a few reasons why.

✔ Design Flexibility

Steel framing is the choice for bespoke architectural designs. The strength to weight ratios offers span capabilities to create open-plan spaces that inspire & delight clients. Building beautiful homes start from the inside.

✔ Rigorous Testing - Specify with Confidence

Straight, true and resistant to deformation, it's the construction benchmark for accuracy. Stärke frame fully complies with all relevant New Zealand Standards, made to strict tolerances for thickness, width, coating and strength. No exceptions.

✔ A Healthier, Safer Home

Steel Framing does not require any preservatives or post-treatment to prolong its life. Allergenic free, dust-free and minimises the use of insecticides, it's widely recognised as a healthier home, and backed by Asthma foundations across the world.

✔ Fast Installation Times

Stärke Frame is fast to install with pre-punched service holes also make it easy for follow on trades too, so your project runs on time.

✔ Reduced Fire Risk

Steel is a non-combustible material. It won't catch fire and presents minimum fire risk compared to wood.

✔ Sustainability & Good Environmental Choice

Optimised engineering ensures Stärke Frame supports structural loads more effectively than timber while using less material. It's 100% recyclable too, making it a sound environmental choice for future generations.

✔ Frames Designed for Stärke Windows & Doors

Improve residential build times & reduce costs with Stärke windows & doors, designed to work seamlessly with Stärke Frame. Tested up to and beyond New Zealand and Australian standards, delivering increased strength & superior water performance.

✔ Exceptional Warranties

In the building industry today, any product that comes with a 50-year warranty is a no brainer. Choose steel.
